

ACE Introduces the EnviroPAK, Eco-Friendly Packaging for the Masses

Ever want a custom package for a short run? How about an eco-friendly package that can be highly customized? The EnviroPAK from ACE is just the ticket.

Combining paper with plastic ACE presents the EnviroPAK a line of packaging solutions sure to revolutionize how we think about "Green" packaging.

"Being 'Green' is tough," says Jun Flores, President of ACE Packaging Inc. in Paramount California, "but with the EnviroPAK you get the best of everything. A package that is easy to assemble, easy to customize yet uses fewer natural resources."

Targeting the On-Demand printer and the Do-it-Yourself (DIY) set, EnviroPAK offers a superior solution over ordinary CD and DVD Packaging. Current offerings of the EnviroPAK include the Presentation Case, O-Card, and Mailer; more options soon to follow. Available in generic white, "you can add labels or print on the paperboard directly, when and however you want. It's truly On-demand," says Flores.

O-Card

Presentation Case

the Mailer

The EnviroPAK is a paperboard enclosure provided flat with a plastic tray insert. Simply insert the disc into the tray, then the tray into the paperboard enclosure. Fold paperboard around the tray and you're done.

Offering the consumer a retail looking package, reducing assembly cost, and most importantly the lightweight plastic tray uses 50% less plastic. "All you have to do is throw on a few labels to give it your own customized look," says Flores. "It's inexpensive, flexible and a great tool for short-run, individual use."

The EnviroPAK is available online at www.ace-cases.com or contact ACE Packaging directly at 800-523-4526.
